

## NEW PRODUCT ANNOUNCEMENT

### The SILENT SENTRY®

**MEDI+Products**, having manufactured the REASSURANCE Emergency Power Supply since 1990, is now introducing a powerful new **ultra-compact** model: The **SILENT SENTRY®**.

The new space-saving design, which is only 14" wide, wall-mounts on a pair of adjacent wall studs or **nestles between them**, further reducing its already trim 7<sup>3</sup>/<sub>4</sub>" depth to as little as 4<sup>1</sup>/<sub>4</sub>"!

It features **BRANCH-CIRCUIT PROTECTION** Circuit Breakers to eliminate the need for an emergency-circuit subpanel. This feature more than pays for itself in installation, hardware and labor savings.

The system is **UPS shippable** and includes a 2000 or 3000 watt inverter with charger, automatic transfer switch, batteries and all controls in an unobtrusive powder-coated steel cabinet complete with adjustable wall mounting flanges.

A companion product featuring a **point-of-use, plug-&-play** design – featuring a corded power feed and integral receptacles – is also available.
